

GALVANOMETER

Model: DCG-1

Technical Features:

- These low-cost devices are designed for use as desk-mounted / table-top units and have rotary winding units, mirror scales and safety sockets in 4mm technology
- These analogue devices do not require any voltage supply, which makes them durable and cost-saving to use
- On the large analogue mirror scale, the respective measured values can be conveniently read by the user or student
- Compact size
- Easy operation and stable work
- Binding post or safety socket connection
- Type: Galvanometer
- Range: $\pm 35\mu A$
